

Kusuma Satya Sreeja Chalasani

Denton, TX | +1 940-629-3270 | kusumasatyasreeja@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Data Science graduate passionate about Data Engineering, Artificial Intelligence, Cloud Computing, and Intelligent Automation. Experienced in building scalable data pipelines, machine learning solutions, RAG applications, and AI-powered workflows using Python, SQL, and cloud technologies. Proven ability to design end-to-end systems that improve decision-making, automate processes, and solve real-world business challenges.

Skills

- **Programming Languages:** Python (Pandas, NumPy, Scikit-learn), SQL
- **Artificial Intelligence & Machine Learning:** Machine Learning (Regression, Classification, Clustering), Natural Language Processing (NLP), Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, Agentic AI Workflows, Vector Databases, LangChain, Model Training & Evaluation, OpenAI API, Google Gemini API
- **Data & Analytics:** Data Pipelines, EDA, Feature Engineering, Tableau, Data Visualization, Excel, Dashboard Development
- **Web & Application Development:** React.js, TypeScript, Flask, REST APIs, Streamlit, Tailwind CSS
- **Databases:** PostgreSQL, SQLite, ChromaDB, IndexedDB
- **Cloud & Tools:** Microsoft Azure, Google Cloud Platform (GCP), Git, GitHub, Splunk, ServiceNow, Jupyter Notebook, Google Colab, Visual Studio Code (VS Code)

Work Experience

University of North Texas - Cross Functional IT Support Specialist

Dec 2024 – May 2026 | Denton, TX

- Managed and maintained operational datasets for 240+ university devices, ensuring data accuracy and system availability
- Analyzed recurring technical issues and generated data-driven insights, improving troubleshooting efficiency by ~20%
- Developed and maintained data tracking, reporting, and documentation workflows for IT operations
- Supported system deployment, updates, and maintenance, reducing downtime and improving operational reliability
- Collaborated with cross-functional IT teams to ensure system performance, scalability, and efficient issue resolution
- Structured and organized datasets to support reporting, analytics, and decision-making processes

Cloud4c | Cloud Support Engineer | Client: DHL

June 2022 - July 2024 | India

- Managed provisioning, decommissioning, and lifecycle operations of cloud-based virtual machines, ensuring system availability and operational reliability.
- Performed infrastructure management tasks including VM snapshots, disk expansion, image deployment, and resource scaling for Windows and Linux environments.
- Monitored cloud infrastructure health, performance metrics, and system alerts, proactively troubleshooting issues to minimize downtime.
- Utilized Splunk for log monitoring, alert management, operational issue resolution across enterprise cloud environments.
- Automated repetitive operational tasks using Python and PowerShell, improving efficiency and reducing manual effort.
- Analyzed infrastructure utilization and performance trends to support capacity planning and resource optimization.
- Worked with Microsoft Azure services for compute, storage, networking, and monitoring operations.
- Managed incidents, service requests, and change activities through ServiceNow while maintaining SLA compliance.
- Collaborated with cross-functional teams to resolve issues and maintain infrastructure reliability.
- Coordinated Microsoft support cases for critical cloud issues, ensuring timely resolution and root cause analysis.

Selected Software & AI Projects

AI-Powered Data Scientist Agent & Explainable AI Dashboard

[GitHub](#) | *March 2026 – April 2026*

- Developed an AI-powered agent that automates end-to-end data analysis, feature engineering, model training, evaluation, and explainability workflows
- Implemented automated EDA, feature engineering, and model evaluation pipelines, reducing manual analysis time by ~40%
- Integrated Explainable AI (XAI) techniques to improve model interpretability and transparency
- Developed interactive dashboards and visual analytics solutions to generate business insights and support data-driven decision-making

Technologies: Python, Scikit-learn, Pandas, Streamlit, React, OpenAI API

RAG-Based AI Interview Prep Assistant

[GitHub](#) | March 2026

- Designed a Retrieval-Augmented Generation (RAG) system for document-based Q&A using dynamic PDF ingestion
- Implemented embedding generation and vector search (ChromaDB), improving response relevance by ~30%
- Built an interactive UI for querying documents with source-backed responses
- Applied prompt engineering to reduce hallucinations and ensure context-aware answers

Technologies: Python, LangChain, ChromaDB, Streamlit, Sentence Transformers, Groq API

AI Guardian: Fraudulent Job Post Detection System

[GitHub](#) | University of North Texas | Jan 2026 - April 2026

- Developed an anomaly detection model (Isolation Forest) to identify fraudulent job postings from metadata features
- Performed exploratory data analysis (EDA) to identify fraud trends, patterns, enabling improved anomaly detection accuracy
- Built a hybrid ML model combining NLP (BERT) and anomaly detection for enhanced classification performance
- Evaluated model performance using precision, recall, F1-score on imbalanced datasets, achieving strong detection accuracy

Technologies: Python, NLP (BERT), Isolation Forest, XGBoost, SHAP, Streamlit

Intelli AI - AI-Powered Internal Talent Matching System

Dallas AI Summer Program | June 2025 - Aug 2025

- Built an NLP-based job matching system to align candidate skills with job descriptions, achieving >90% matching accuracy
- Developed semantic matching workflows using NLP and similarity scoring to align employee skills with job requirements
- Automated email notifications using Gmail API for real-time communication
- Improved recommendation accuracy through iterative feature optimization

Technologies: Python, PostgreSQL, Gmail API, NLP, AI

Real-Time Crime Data Streaming & Visualization - Google Cloud Platform

University of North Texas | April 2025 - May 2025

- Built a real-time data pipeline using PySpark Structured Streaming on Google Cloud Dataproc
- Processed and analyzed large-scale streaming data to identify crime trends, generate actionable insights, and support predictive analytics workflows
- Performed data aggregation and visualization using BigQuery and Python

Technologies: PySpark, Google Cloud Platform (Dataproc, BigQuery, Cloud Storage), Python

LUMA: AI-Powered Emotional Wellness Companion

Sep 2025 – Oct 2025

- Developed a full-stack web application with frontend (React, TypeScript) and backend API integration for personalized AI-driven emotional support
- Built an emotion-aware conversational AI system with context retention and tone analysis
- Implemented mood tracking with AI-generated visualizations and journaling features
- Designed analytics dashboards to track user engagement and mood trends

Technologies: React, TypeScript, Google Gemini API, IndexedDB, Tailwind CSS, Recharts, Web Speech API

Education

Master of Science, Data Science | University of North Texas | May 2026 | GPA: 4.0/4.0

Bachelor of Science, Data Science and Data Analytics | Loyola Academy Degree & PG College | May 2022

AI Programs & Fellowships

Dallas AI Summer Program | Southern Methodist University (SMU) | Summer 2025

- Selected for a competitive 8-week applied AI program featuring mentorship from leaders across AI, cloud, and enterprise technology.
- Served as the primary Solution Engineer for Intelli AI, leading the design and implementation of an AI-powered talent matching platform leveraging NLP, semantic similarity, and workflow automation.
- Designed and developed practical AI solutions addressing real-world business challenges under industry mentorship.
- Collaborated with multidisciplinary teams to translate business requirements into scalable AI-driven solutions.
- Participated in technical workshops, project showcases, collaborative problem-solving sessions focused on applied AI/ML.
- Presented Intelli AI's technical architecture, implementation approach, and outcomes during the program's final showcase.

Certifications

- Claude 101 [Certificate](#) | Anthropic | June 2026
- AI Fluency: Framework & Foundations [Certificate](#) | Anthropic | March 2026
- Introduction to Model Context Protocol (MCP) [Certificate](#) | Anthropic | March 2026
- Oracle Cloud Infrastructure Generative AI [Certificate](#) | Oracle | Oct 2025
- Azure Fundamentals AZ - 900 [Certificate](#) | Microsoft Certified | Feb 2023
